

*Reliable Innovation for
Consumables & Optimization*

A Complete Line of High Performance Edge Control and Wave Management Products to Improve Your Sheet Profile.

Wave Management / Profile Improvement / Sheet Quality

No Other System Can Impact Sheet Profiles Like FabCurl,[™] Edge Control and Wave Management.

The FabCurl edge control system allows optimization of basis weight, moisture, and TSO angle profiles at the sheet edge, and no other system on the market today can impact profiles like FabCurl.

Today's FabCurl system can either eliminate or manage the location of edge waves on the fourdrinier table. Our unique baffle board design dips into the stock giving you control of the edge wave. Plus, it is easy to keep clean as a result of well positioned showering. Quick release pins make removal for wire changes easy and fast.

Examples of recent mill sheet profile improvements with FabCurl:

- **70% reduction** in CD 2 sigma moisture variation (pulp machine)
- **55% reduction** in CD 2 sigma basis weight variation (bleached board)
- **70% reduction** in CD 2 sigma basis weight variation (bleached board)
- **2% increase** in production through increased saleable trim (linerboard)
- **58% reduction** in TSO angle profile min/max range (copy paper)

Edge Spreader Deckle Board for Clean Edges.

Coldwater deckle boards help control the stock as it exits the headbox and have become the best running and most operator-friendly deckle boards on the market. Performance benefits include:

- Can start with a cheeking piece extension.
- Hinged design is adjustable in and out of stock stream.
- Drip shower keeps the unit running clean.
- Rugged construction with all stainless steel components.
- 90 degree Teflon insert provides:
 - > Excellent seal to wire
 - > Longer wear life
 - > Very easy on forming fabrics
 - > On-the-run adjustability
 - > No tearing and no fiber build-up

Let Consumables Optimization Management Be Our Problem.

Let us help you manage your paper machine consumables. Our COM program packages these many products and services into one spend with volume rebates and consignment programs matched to the need. COM can be structured for machine level, mill level or corporate level needs. Contact your local representative for more information.
