**We bring you overview**

The tissue machine is a **complex set** of interconnected parts. Any action producing benefit in one part may be producing damage in another part. It is necessary to consider the machine as a whole.

Lantier's **over 25 year experience** helps tissuemakers optimize their machine.

It's the **advantage of counting on a specialist.**

Lantier Technology

# Solutions for the Tissue Machine

Since our **foundation in 1987**, in Lantier we have been dedicating ourselves to offer to our Papermaking Customers, solutions in all sorts of applications related to **Creping Doctors, Doctors, Showers, Tail Cutters, and Profiling**, in pulp, paper, board, and tissue machines.

In these more than 25 years, we have successfully solved numerous situations for our **customers located all over the world.**

Our products provide **efficiency, productivity and resource savings** in the tissue machine.

In Lantier we are **specialists** and as specialists we **offer the best product and the best service.**

**Lantier around the world – Service fast and close**

Lantier has **sales representatives in 50 countries**, who will be glad to take care of you directly from your own country.

We have production **sites and raw material warehouses in all 5 continents**, sites which allow us to satisfy our customer's needs with a **close and fast service of supply of doctor blades and spare parts** for all our equipments.

The location of our factories in Europe, Asia, and America allows us in turn, ensure a **fast and close local technical assistance service**, not only for Lantier equipment, but for equipment from any other manufacturer.

Those who trust Lantier can count on the security of high **quality support and excellent service** that will lead them to improving the efficiency of their tissue machine
